2. No First Use

To reduce the likelihood of a nuclear war taking place as a result of accident or miscalculation, there is a bill in the US Congress calling on the President to adopt a policy of "No First Use," meaning that the US would publicly declare its commitment not be the first to use nuclear weapons. If you had to choose, which one, if any, of the following statements comes closest to your opinion on the matter?

	Total	Age				Gender		College/no college		3 point party ID

3. Treaty on the Prohibition of Nuclear Weapons

The Treaty on the Prohibition of Nuclear Weapons entered into force on January 22, 2021. This treaty bans the development, production, deployment, use and threat of use of nuclear weapons. So far, 86 countries have signed this treaty (i.e., they have agreed to comply with its terms) and of them, 60 have ratified it (i.e., they have passed legislation in their countries to ensure that they comply with its terms). The US has done neither. If you had to choose, which one, if any, of the following statements comes closest to your opinion on the matter?

4. Massachusetts Citizens' Commission

Massachusetts has been identified as a likely target in the event of a nuclear war. Currently there is a bill in the MA State House that would establish a Citizens' Commission to investigate and report on what measures may be necessary and appropriate to protect MA citizens from nuclear weapons. Do you support the establishment of a citizen's commission?
